WOODWORK

Paper 1
(Design and Drawing)

3 hours
O

INSTRUCTIONS TO CANDIDATES:

*This examination paper consists of two **compulsory** items.*

*Respond to **all** items.*

*Responses to item **1** must be in the answer booklet provided.*

*Responses to item **2** should be done on the drawing paper size **A2** provided.*

1. The school has organised an orientation programme for Senior Five Woodwork students about key aspects of the subject. The head of department selected the workshop practices as an essential aspect for the programme. Meanwhile the match boarded window shutters shown in figure 1 for the workshop are damaged. The Head of department suggested that making new match boarded shutters be the main aspect to justify the study of the subject at Advanced level. A presentation to that effect is therefore needed during the orientation.

Fig. 1

Task:

Generate a presentation for the orientation programme.

2. A chef owns a catering company in one of the Kampala suburbs. She bought bigger plates that cannot be accommodated in the available plate rack shown in figure 2. She wants an improved plate rack that is deeper and wider with handles that can bear the weight of the new plates.

She contacted a carpenter who requested for working drawings (exploded views of different joints, front elevation, plan and sectional end elevations) of the new rack. Unfortunately, she is unable to produce the required information.

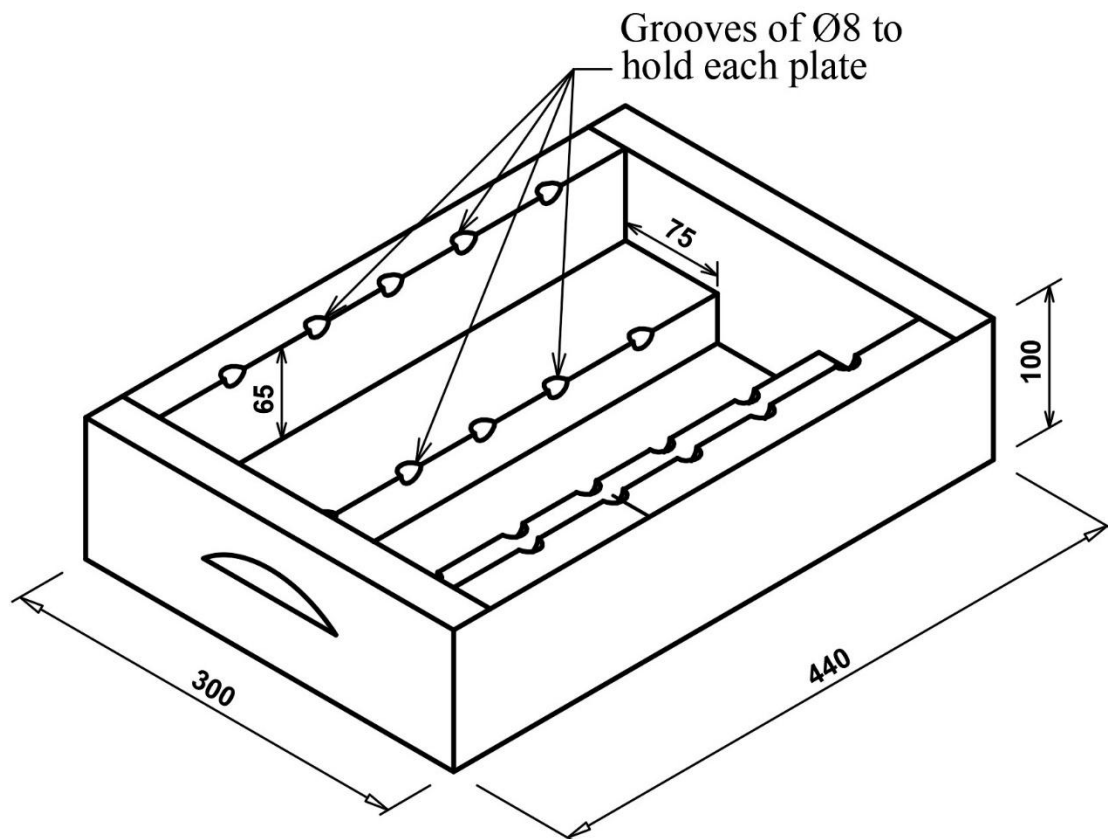

Fig. 2

Task:

Produce the required scaled drawings that will help the carpenter come up with a new rack.
